Mid-Century Modern – Visionary Furniture Design from Vienna

Caroline Wohlgemuth

2021-12-31 In 1938, Vienna lost its best and most creative minds.

This rupture was manifested in all of the arts and sciences and its mark is felt to this day – not least in the field of furniture design.

With inexhaustible creativity the Jewish furniture designers who were forced to flee Vienna continued to work while in exile. They taught at the best universities and spread their ideas and vision throughout the entire world. Their creations became classics of twentieth-century furniture design, the epitome of mid-century modern style. This book honors the memory of the exiled designers with a

thorough overview of their work. It details their life stories and their visionary designs, which remain as relevant and contemporary as ever, and brings to light new aspects of the history of Viennese furniture design.

Close Range

Photogrammetry Thomas Luhmann 2007-01-09 An authoritative guide to close range photogrammetry. The first comprehensive modern text on this subject in English, expanded and updated from the German text by Luhmann. This book provides a thorough presentation of the methods, mathematics, systems and applications which comprise the subject of close range photogrammetry, which uses accurate imaging techniques to analyse the three-dimensional shape of a wide range of manufactured and natural objects. Close range photogrammetry, for the most part entirely digital, has become an accepted, powerful and readily available technique for engineers

and scientists who wish to utilise images to make accurate 3-D measurements of complex objects. After an introduction, the book provides fundamental mathematics, including orientation, digital imaging processing and 3-D reconstruction methods, as well as presenting a discussion of imaging technology including targeting and illumination, hardware and software systems. Finally it gives a short overview of photogrammetric solutions for typical applications in engineering, manufacturing, medical

science, architecture, archaeology and other fields.
